THERMOCOUPLE WIRE and CONNECTOR

Thermocouple Wire:

1. Thermocouple Wire - K Type, Duplex Insulated	
2. Thermocouple Wire - T Type, Duplex Insulated	

* Various sizes and Type are available for your application

Thermocouple Connector:

SMP, SMPW, HMP and HMPW

Miniature Connectors With and Without Write-on Window, Standard and Extended Temperature Range.

SMPW Series

Part No	For Type
0000MWTM	Male for "T" Type
0001MWTF	Female for "T" Type
0000MWKM	Male for "K" Type
0001MWKF	Female for "K" Type

The miniature connectors are ideal for even the most demanding temperature measurement applications. These connectors offer a host of features including, heavy-duty construction, IEC and ISA color-coding, removable reversible write-on window and chisel point male contacts for ease of connection. Four basic models are available.

SMP & SMPW Series Rated to 220°C (425°F)

SMP	Glass filled Nylon Construction
SMPW	Glass filled Nylon Construction with Write-On Window
HMP	Liquid Crystal Polymer Construction for Higher Temperature Service
HMPW	Liquid Crystal Polymer Construction for Higher Temperature Service with Write-On Window
